The State of CCS Technology and Policy

In this talk, I will give an overview of the current state of technology and policy related to Carbon Dioxide Capture and Storage (CCS). I'll cover seven aspects of CCS: (1) the role of CCS in addressing the climate change challenge, (2) a summary of large CCS projects in operation, (3) the current status and future directions for capture technology, (4) the current status and future directions for storage technology, (5) how to view negative emissions, (6) the policies and politics around CCS, and (7) what the future may hold.
