

2016 UB ENGINEERING DESIGN CAMP

August 22 - 26, 2016, 9:00 am - 4:00 pm

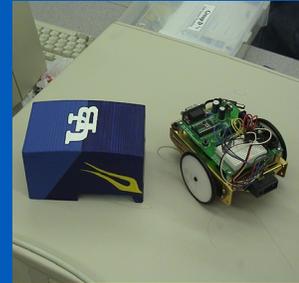

Interested in taking apart toys and other products to see how they work?

How about using 3-D printers to make something?

Join us this summer at UB's Engineering Design Camp. Participants will be guided by UB faculty and students as they:

- "Tear down" products to learn what's inside
- Program and use robots
- Design and build using 3-D printers
- Explore advanced manufacturing through field trips and team-based activities

Sponsored by Northrop Grumman and UB's School of Engineering and Applied Sciences, the camp will take place from August 22 to 26 on the North Campus of the University at Buffalo. The program will focus on hands-on experiences for students as they take a design from "art to part".

Here
IS HOW.

Registration deadline date is Friday, July 29, 2016.

Students entering grades 9-12 who have a strong science and mathematical ability, and an interest in a career in STEM are encouraged to register for the camp.

We are especially interested in students from groups that are under-represented in STEM professions.

Tuition is \$300. Each student will receive a certificate at the completion of the program.

To register, scan this QR code or go to the link at the bottom of this page.
