Research Category: B) AI/ML, D) Interdisciplinary

Research Area: Computational social science, Computing for Social Good

Selected Research Projects:
- NSF: CAREER: Promoting Equal Opportunities through Measurement, Simulation, and Education
- NSF: FAI: Building a Fair Recommender System for Foster Care Services within the Constraints of a Sociotechnical System

- Mixed Methods Approaches to Studying Child Welfare
- Mixed-methods Studies of Social Inequality
- Computational Text Analysis of Stereotypes
- Agent-based modeling of structural gender inequalities
